Licence conditions

One user with one subscription is only permitted to use TraderGroup Signal on one account and on one instrument at a time.

User rights are not transferrable.

Subscription may end in 3 ways:

- If user uses recurring payment and their account runs out of cover.
- If recurring payment is terminated by the user (the program will show the exact date of the termination).
- Refund. If the user decides to take advantage of our 30 days money back guarantee, with the refund the subscription ends.

Depending on the subscription package, the subscription ends on the same day and in the same hour of the appropriate month as when it was paid for.

Subscriber acknowledges that Forex Investments Ltd. is not to be held responsible for any losses and damages occurring from trading or from the use of its product.

Subscriber has read and accepted the Risk Warning.

Installation of MetaTrader 4

The MetaTrader 4 program can be downloaded directly from MetaQuotes Software's dedicated MT4 web site (metatrader4.com) or through any of the large number of Forex brokers that offer the program. Installation only takes a few minutes with a high-speed Internet connection. After clicking on "Download", a MetaTrader 4 Setup window will appear, as shown in Figure 1. Read the license agreement, and then click "Next" to begin the installation.

Use of TraderGroup Signal

Being a subscriber, with this software you can have the Group's trades executed on your Forex account without any supervision.

The use and adjustment of the software is very simple;
we aim to guide you through the steps of its proper use with this presentment.

Connecting the MetaTrader with the client software.

If you have not chosen the 'Setup Charts with optimized properties' option at installation then you will have to perform this process manually. After the start of your MetaTrader4 open up the 'Navigator' window (CTRL+N).

Look for the 'Expert Advisors' branch and open it. There you will find the 'SignalSlave' expert. Grab and drag it to an optional chart (we suggest the EURUSD M1).

Settings

- **Price deviation:** Although the system is faster than any other signal forwarding services, due to the brokers' typical excursions in the course of exchange it is possible that your broker will score a different price than on the Master account (on the trader's account). In this case you have the opportunity to set the relevance range with which the system is allowed to execute trades. You can set separate values for the cases of your broker giving either a better or a worse price than what the open price is on the Master account.
- Here you can set how big difference are you going to allow compared to the opening price. The system is faster than any other signal provider system, but it can happen, that because of the unique quotations, Dealing Desks of the brokers , or the bad connection can cause significant differences between the prices, so the trades can move to a negative direction. This setting allows you to grant the maximum differences for the software to open each trade. The default setting is -5-10 pip difference, this is an average value. A more narrow value can cause the miss of a few trades, a wider value can cause a huge difference from the result of the signal.

Settings

Money management:

- Every broker set minimum and maximum values for the allowed lot size per single trade. They also inform of the smallest unit in which lot size shall be counted. The system automatically adjusts the calculated value to the regulations employed by the broker using standard rounding rules. A relative lot size correlated to 100.000 asset, and if it's turned off, you have to set the fix lot size.

- The 100.000 asset means that if $ 100.000 is 1 lot (with this setting) the trades will be fulfilled with 1 lot, this means 0.5 lot with $ 50.000 and 0.01 lot with $ 1000. If you increase orreduce this ratio, the lot size of the new openings will change propotionally. If you turn Money Management off, the trades will be opened with the default settings.

- If 'Lot ratio' is set to 'ON' then the system does the trading proportional to the equity. Here you can modify TraderGroup Signal's default settings. With the increase of this value you increase the leverage therefore the risk also increases accordingly. Likewise, by decreasing this value you can reduce the risk of trading. TraderGroup Signal does never use leverage settings by itself, so on a $10.000 account the lot size would be 0.1 (mini) by default. If you leave the default settings untouched and have a $3.000 account for example your trades will be executed with 0.03 lot. In a $15.000 account's case this value is 0.15 lot. Taking the above examples, if you decide to switch the multiplier to 2.0 then on a $3.000 account trades will be executed with 0.06 lot and on a $15.000 one with 0.3 lot.

- If the'Lot ratio' is set to 'OFF' then Fix lot will be applied. You can change fix lot size by increasing or decreasing this value.

Services

Ultra fast communication: The system uses direct TCP connection for communication that enables bandwidth-sparing and ultra fast communication between the client and the server thus trading events are also processed essentially immediately.

Precise money management: The system determines trading values according to your settings and the requirements provided by the broker.

Minimizing differences from the source: The 'Magnet' service does not let your trades' values differ too much from the starting prices received from the Master thus eliminating risks arising from incidental price differences. Given a particular trade, if the price returns to between the Magnet values, the trade gets activated instantly so you do not lose out on potential profitable trades.

Manual-intervention monitor: If you terminate a trade for any reason, the system detects it and will not attempt to reopen the position in any case.

Expert-friendly system: If you choose to trade on your account manually or with another expert (or experts) too, you can safely do so due to the system's 'Magic Number' feature with which it identifies its own trades uniquely, never affecting other system's trades. But before putting other trading tools into use on you account make sure they are expert-friendly as well, else they can modify or close TraderGroup Signal's trades. The latter is considered manual intervention by the system and it will not reopen the position.

Terms of Use Agreement
Last updated: September 1, 2012
NOTICE
Please read these terms and conditions carefully. By accessing our site and any pages thereof, you agree you are over fourteen years old and to be bound by the terms and conditions below. If you do not agree to the terms and conditions below, do not access our site, or any pages thereof.
USE OF INFORMATION AND MATERIALS
The information and materials contained in these pages, and the terms, conditions, and descriptions that appear, are subject to change. Please check this Agreement periodically for changes as Tradergroup Signal reserves the right to revise this Agreement; that version will then apply to all use by you following the date of publication. Each access of information from TraderGroup Signal will be a separate, discrete transaction based on the then prevailing terms. These Terms of Use shall be governed by, construed and enforced in accordance with the laws of owner's country, as it is applied to agreements entered into and to be performed entirely within such jurisdiction. Your continued use of this site following the posting of any changes to the Agreement constitutes acceptance of such changes.
The use of the content or materials of TraderGroup Signal's sites for any purpose not expressly permitted in this Terms of Use or by having a written permission from TraderGroup Signal is prohibited. Unauthorized use of tradergroupsignal.com's websites and systems, misuse of passwords, or misuse of any information posted on any of our sites is strictly prohibited. All products and services are available in all geographic areas. Your eligibility for particular products and services is subject to final determination by tradergroupsignal.com and/or its affiliates.

Terms of use

If a dispute arises under this agreement, we agree to first try to resolve it with the help of a mutually agreed-upon mediator in the website owner's jurisdiction. Any costs and fees other than attorney fees associated with the mediation will be shared equally by each of us.

If it proves impossible to arrive at a mutually satisfactory solution through mediation, we agree to submit the dispute to binding arbitration in the state of owner's country. Judgment upon the award rendered by the arbitration may be entered in any court with jurisdiction to do so.

If any provision of this agreement is void or unenforceable in whole or in part, the remaining provisions of this Agreement shall not be affected thereby.

MISCELLANEOUS
You may not assign or otherwise transfer these Terms of Use or any rights or obligations hereunder. TraderGroup Signal's failure to act on any breach of any provision hereof shall not be construed as a waiver of the enforcement of any provision unless TraderGroup Signal agrees to such waiver in writing.
If any portion of these Terms of Use is deemed unlawful, void or unenforceable, that portion will be deemed severable and will not affect the validity or enforceability of the remaining provisions. These Terms of Use set forth the entire understanding between you and TraderGroup Signal with respect to the subject matter hereof and supersede any prior or contemporaneous communications, representations, or agreements, whether oral or written, between you and TraderGroup Signal with respect to such subject matter.

CFTC RULE
HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACTOF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
